

## Turning oranges into electricity. Crazy or genius?

[Send an [article \[eslbrains.com/crc002\]](https://eslbrains.com/crc002) about an eco-friendly solution adopted by Seville to your students so that they can read it before the class.]

### 1. Complete the gaps with synonyms of the verbs below.

VERB		SYNONYM
use	→	consume
produce	→	generate
give	energy/electricity →	provide
save	→	preserve
store	→	accumulate

### 2. Discuss the questions.

- Do you like the initiative of turning oranges into electricity in Seville?
- What other ideas to generate energy sustainably have you heard of?
- What measures does your city or country take to be more environmentally sustainable?
- Do you ever think about how much energy you and your family consume? What do you do to preserve energy as an individual?
- Do you make any eco-friendly choices? If yes, give some examples.

### 3. Seville's initiative is to turn leftover oranges into electricity. What could we turn the following items into, to reuse them and be more environmentally friendly?

- waste office paper
- old cans
- old clothes
- old pallets
- chipped mugs
